

# COMBINED AIR/EANx DIVE TABLES

DOPLER NO-DECOMPRESSION LIMITS BASED ON U.S. NAVY DIVE TABLES

## TABLE 1 No-Decompression Limits and Repetitive Group Designation Table For No-Decompression Dives

DEPTH IN METRES			Doppler limits (minutes)	HOW TO USE TABLE 1: Find the planned depth of your dive in metres at the far left of Table 1. Read to the right until you find the time (minutes) you plan to spend at that depth. Read down to find the Group Designation letter.											
AIR PO <sub>2</sub>	EAN32 PO <sub>2</sub>	EAN36 PO <sub>2</sub>		60	120	210	300	225	350	240	325	245	205	160	130

40 1.05			5			5									

GROUP DESIGNATION: **A B C D E F G H I J K**

### HOW TO USE TABLE 2:

Enter with the Group Designation letter from Table 1. Follow the arrow down to the corresponding letter on Table 2. To the left of these letters are windows of time. Read to the left until you find the times between which your surface interval falls. Then read down until you find your New Group Designation letter. Dives following surface intervals of more than 12 hours are not repetitive dives.

**HOW TO USE**

**TABLE 3:**

Enter with the New Group Designation letter from Table 2. Next, find the planned depth of your repetitive dive in metres at the far left of Table 3. The box that intersects the Repetitive Dive Depth and the New Group Designation will have two numbers. The top number indicates the Residual Nitrogen Time. The bottom number indicates the maximum Adjusted No-Decompression Time Limit for the next dive.

**WARNING:** The U.S. Navy Dive Tables were designed to Navy specifications for use by Navy Divers. When used by recreational divers, the tables should be used conservatively. Even when used correctly with proper safety procedures, **decompression sickness may still occur.**

**SAFETY STOP PROCEDURE:** *It is recommended that you make a 3- to 5-minute safety stop at 5 metres on all dives over 9 metres.*

**OMITTED DECOMPRESSION PROCEDURE:** Should you exceed the Doppler No-Decompression Time Limits by less than 5 minutes on any dive, it is recommended that you ascend normally to 5 metres and stop for at least 10 minutes or longer if your air supply allows. Should you exceed the Doppler No-Decompression Time Limits by more than 5 minutes but less than 10 minutes on any dive, it is recommended that you stop at 5 metres for at least 20 minutes or longer if your air supply allows.

**Refrain from any further scuba diving activities for at least 24 hours.**
